EDUCATION HISTORY

Bachelor of Information Technology – Jan 2022 – Sept 2025

RMIT University Vietnam | Graduated

MBA in Healthcare Technology – Aug 2025 – Present

MCPHS University, Boston, MA | Current

LANGUAGES

Vietnamese, Native

English, 7.0 Overall IELTS

Japanese, N5

ACHIEVEMENT

Semi-Final RMIT business plan

HD score in RMIT Capstone Project

Best Software Project in IT & Software

ABOUT ME

At the age of 15, I took a significant step in my personal and educational journey by moving from my small town to Ho Chi Minh City, demonstrating my adaptability and determination to pursue greater learning opportunities. This early experience of embracing change has shaped my approach to challenges and growth throughout my career.

Continuing my self-improvement journey, I have now moved from Ho Chi Minh City to Boston, where I am currently pursuing my MBA in Healthcare Technology at MCPHS University. This transition represents my commitment to bridging the intersection of data analytics, business strategy, and healthcare innovation.

PROFESSIONAL SUMMARY

As a dedicated Data Analyst with a bachelor's degree in information technology and growing expertise in healthcare technology, I bring proven capabilities in data analysis, business intelligence, and strategic decision-making. My professional experience includes analyzing complex datasets, creating insightful visualizations, and optimizing data processes to support informed business decisions. I possess strong problem-solving skills and demonstrate adaptability in fast-paced, dynamic environments.

I am actively seeking opportunities in:

- **Data/Business Analysis in Healthcare** - Leveraging data to improve patient outcomes and operational efficiency
- **Healthcare Consulting** - Providing strategic insights to healthcare organizations
- **Business Administration in Healthcare** - Managing and optimizing healthcare operations

I am enthusiastic about applying my technical proficiency, business acumen, and positive attitude to contribute meaningfully to healthcare organizations committed to innovation and excellence.

WORK EXPERIENCE

Data Analysis Intern

VietA Joint Stock Bank | Mar 2024 – Jul 2024

- Collaborated with the core software team to build data warehouse
- Designed a customer prediction system based on customer behavior data

AI Educational Platform Developer

RMIT University Vietnam - SSET (School of Science, Engineering & Technology) | Feb 2025 – Oct 2025 | 9 Months Academic Project

- Developed SocratesCode, an AI-powered educational assistant that transforms programming education through personalized, adaptive learning
- Integrated cognitive load theory with generative AI to create a Socratic tutor that adapts to individual student proficiency levels
- Designed and implemented adaptive learning scenarios, cluding worked examples, incomplete examples, and error-based learning activities
- Applied educational technology principles to prevent AI manipulation while maintaining effective personalized tutoring
- Developed system grading and result analysis for better understanding

Part time Teacher

TEKY Technology School | Aug 2023 – Oct 2023

- Completed intensive 3-week training program in educational technology
- Served as teaching assistant for Python programming courses
- Developed communication and mentoring skills by working with diverse student groups

SKILLS

Technical Skills

- SQL and Database Management** - Advanced query optimization and data warehousing
- Data Cleaning and Visualization** - Proficient in creating actionable insights from complex datasets via coding or Tableau, Power BI
- Statistical Analysis** - Applied statistical methods for predictive

modeling

Microsoft 365 - Advanced Excel, Power BI, and Office suite

GitHub - Version control and collaborative development

Healthcare Analytics - Electronic Health Records (EHR) analysis, healthcare metrics

Business Skill

Problem Solving and Critical Thinking - Strategic approach to complex business challenges

Teamwork and Collaboration - Experience in cross-functional multi-team environments

Communication - Effective presentation of technical concepts to non-technical stakeholders

Adaptability and Flexibility - Proven ability to thrive in new environments and cultures

Positive Attitude and Confidence - Growth mindset and resilience in challenging situations

Healthcare Business Understanding - Understanding of healthcare operations, regulations, and market dynamics
